

Basic lift technology

This course is designed to enhance understanding of the technical and practical aspects of lift technology for staff responsible for operating an efficient lift service within their premises.

COURSE OUTLINE

- Lift technology and the operating principles of lifts.
- Understanding the terminology used by contractors and surveyors.
- The legal and mandatory obligations for installing, maintaining and operating an efficient lift service.
- Understanding roles and responsibilities under The Lifting Operations and Lifting Equipment Regulations 1998 (LOLER) and other relevant legislation.
- Where applicable for NHS Trust sites, the roles and responsibilities of the Authorised Person, Competent Person, Designated Person, duty holder, lift release wardens and designated staff under HTM 08-02.
- Practical inspection of the lifts on site, with a particular emphasis on the maintenance of lift components and good or bad practice.

Training is delivered on site and is bespoke to the lift equipment on your premises. The course is limited to a maximum of seven candidates for safety reasons when working with live lift equipment.
