

Rescue of casualties

Training for first responders dealing with lift incidents

A bespoke training course for emergency response crews that need to assess and resolve a variety of casualty scenarios when dealing with the evacuation, rescue and retrieval of casualties from lift incidents.

LEARNING POINTS

- General safety systems on lifts.
- Basic lift drive systems and lift configurations.
- The types of lift components and their purpose and operation.
- Isolation procedures.
- How to assess the direction of the lift travel.
- How to raise or lower the lift car.
- How to open the lift doors.
- The ability to assess and resolve a variety of casualty scenarios

This is a bespoke course tailored to specific needs. Please get in touch to discuss your requirements.
